PROFESSIONAL SUMMARY

Operations Team Lead with 10+ years in high-volume, metrics-driven BPO and shared services environments, including 2+ years leading a 45-member team across the full order management, order fulfillment, and order-to-delivery lifecycle. Hands-on working knowledge of order entry and stock verification in SAP, Post Goods Issue (PGI) processing, coordination with warehouse teams for pick/pack, and coordination with logistics/carrier teams to track deliveries and resolve delay exceptions end to end. Skilled in managing a shift, monitoring service-level metrics and dashboards, coaching agents at all levels, and reducing escalations through structured root-cause analysis rather than top-down direction. Proven track record identifying process improvement opportunities and driving them to completion, partnering cross-functionally with Sales, Revenue Operations, Warehouse, Logistics, and Ops Excellence teams to support transformation programs from testing through post-go-live stabilization.

CORE COMPETENCIES

- Order Management & Order Fulfillment
- Warehouse & Logistics/Carrier Coordination
- Team Leadership & Daily Shift Management
- Escalation Reduction & Root-Cause Coaching
- Quality Management & Compliance/Audit Readiness
- Coaching & Agent Development
- SAP, Salesforce, Oracle
- Order-to-Delivery Process Ownership
- Delivery Exception & Delay Resolution
- Performance Metrics & Dashboard Monitoring
- Process Improvement & Change Management
- Cross-Functional Stakeholder Communication
- High-Volume, Deadline-Driven Operations
- MS Office Suite

KEY ACHIEVEMENTS

- Led a 45-member order management / order fulfillment team managing the full order-to-delivery cycle, sustaining 98% process accuracy across high-volume daily deliverables.
- Reduced escalation volume by 35% through structured, coaching-led root-cause analysis of delivery and process exceptions.
- Resolved 95% of post-go-live incidents within SLA during a large-scale order management transformation and transition initiative.
- Improved operational cycle time by 30% through process optimization and automation.
- Identified and closed 200+ defects across SIT, UAT, and E2E testing cycles, strengthening quality and governance outcomes.

PROFESSIONAL EXPERIENCE

Senior Business Analyst | Mphasis

Aug 2024 – Nov 2025

- Owned escalation and governance across data, process, and operational issues during a large-scale order management transformation and transition program, coordinating resolution across Business, Finance, and IT.
- Directed SIT, UAT, and E2E testing cycles as part of program deployment, resolving 95% of post-go-live incidents within SLA through structured prioritization and issue triage.
- Maintained program documentation, SOPs, and training playbooks to support transition readiness and team-wide adoption during stabilization.
- Partnered with cross-functional Business, Finance, and IT stakeholders to improve order fulfillment and process accuracy during post-transition stabilization.

Assistant Manager (Team Leader) | Genpact

May 2022 – Aug 2024

- Led daily operations for a 45-member outsourced delivery team managing the end-to-end order management and order-to-delivery process: order receipt and stock availability checks in SAP, Post Goods Issue (PGI) processing, and handoff to the warehouse team for picking and packing.

- Coordinated with logistics/carrier teams to track shipments post-dispatch, resolving delay exceptions and proactively communicating delivery status updates; managed post-delivery exceptions (missing/damaged goods) and served as primary escalation point for complex order, delivery, and logistics-partner disputes.
- Built and owned the governance operating rhythm — SLA, TAT, quality, and reporting scorecards — achieving 98% process accuracy through structured monitoring, coaching, and escalation resolution.
- Coached team members at all levels, developing underperformers through hands-on, show-me guidance while continuing to challenge and retain top performers, reducing escalation volume by 35% through root-cause coaching rather than reactive intervention.
- Partnered cross-functionally with Warehouse, Logistics, and Finance teams to optimize staffing, workload planning, and process flow, translating lessons learned into scalable playbooks.

Senior Business Operation Analyst / Commvault

Oct 2021 – Apr 2022

- Managed end-to-end order management workflows in a high-volume, deadline-driven environment, reviewing order and fulfillment data for completeness, accuracy, and policy adherence.
- Partnered with Sales and Deal Desk teams to resolve order and delivery issues while maintaining a consistent, reliable customer/stakeholder experience.
- Contributed to reporting and process improvement initiatives to strengthen operational efficiency and team performance.

Senior Analyst – Professional Services / VMware

Jul 2020 – Aug 2021

- Managed daily order management transactions and customer-facing fulfillment activities, prioritizing workload to meet tight turnaround times in a fast-paced, metrics-driven setting.
- Improved cycle times by 30% through process automation and operational enhancements, directly improving the customer experience.
- Provided reporting and operational support during period-end close, coordinating with multiple stakeholders under deadline pressure.

Operational Specialist / Just Energy

Jan 2019 – May 2020

- Addressed complex customer-facing order and account issues while maintaining strict SLA compliance in a high-volume environment.
- Reduced escalation volume by 35% through structured root-cause analysis and proactive, coaching-driven corrective action planning, improving overall customer satisfaction.
- Facilitated process controls, quality initiatives, and regular account/performance reviews.

Senior Process Associate – Operations / Capita

Aug 2015 – Dec 2018

- Executed high-volume, process-driven order management operations in a fast-paced BPO environment, maintaining order and data accuracy in compliance with defined SOPs.
- Supported reporting, internal audits, and continuous process improvement initiatives across the team.

TOOLS & SYSTEMS

SAP (Order Entry, Stock Check, PGI) • Order Management & Fulfillment Systems • Warehouse & Logistics Coordination • Microsoft Office Suite (Word, Excel, PowerPoint, Outlook) • ERP/CRM Platforms: SAP, Salesforce, Oracle • Reporting & Analytics Dashboards • SOP & Playbook Documentation • Compliance & Audit Readiness

EDUCATION

Bachelor of Commerce (B.Com) – Accounting & Finance | Vikram Deb University
